

MOTHER / BABY MEDBAND BY *DATA*RAY

USING DATARAY MATCHPRINT ID TECHNOLOGY

Mother/Baby MedBand, a DataRay Safety Solution, is a set of wristbands for a mother and her new baby. MatchPrint ID technology creates a unique identifier that is printed on the wristbands providing security for the youngest patients.

The Patient's printed set of 4 wristbands - 2 adult and 2 baby, allows healthcare providers the ability to apply a wristband to the newborn baby matching Mother's wristband and eliminating multiple bands on baby's little arm/leg.

MOTHER/BABY MEDBAND DISTINCTIONS

- MatchPrint ID technology creates a unique identifier for Mother/Baby
- Alleviates having multiple bands on baby (replaces separate BCMA, Alert, and unique ID bands with one single band)
- Set of 4 wristbands - 2 adult and 2 baby
- Includes 7 technologies for highest bar code read rate
- DataRay Mother/Baby MedBand allows custom label layout and design, including integration for bar codes, font selections, and graphics
- DataRay MedMap technology connects thermal printers to any Hospital Information System without support from IT
- Compatible with virtually every EHR including VistA, RPMS, Epic, Meditech, and Cerner
